Important Safety Information for All Clients

Instructions before the day of surgery:

1. You pet must have nothing to eat after 12am the evening before surgery. Water is ok.
It is very dangerous to your animals health to feed them before surgery.
2. Outside pets should be brought inside the night before surgery to prevent them from “scavenging” for food.
3. Please ensure your animal is clean and free of fleas and ticks.
4. Tell clinic staff if your animal shows any sign of sickness, you may need to reschedule or we may send them home.
5. All dogs should be on a leash. Please muzzle aggressive dogs.
6. Each cat should be in its own carrier at the time of drop off and pick up.

We may refuse surgery to an animal. Reasons for refusal may be, but are not limited to:

1. Animals that are known to have been fed after 12am the evening before.
2. Aggressive animals that are not muzzled or animals still deemed too aggressive after being muzzled.
3. Animals that are extremely unclean or flea/tick infested.
4. Animals with known health issues, such as a heart murmur.
5. Animals determined by our veterinarians to be older than 5 years old without bloodwork (CBC and Chemistry Panel) .

If any of these situations apply to your animal, please discuss this with a clinic associate when making your appointment. We may be able to make special arrangements if we know the issue in advance. This is for the safety of your animals and our staff.

There is a kenneling charge of \$10 for animals not picked up by 8am (4:00pm on Friday surgeries).
